A family owned business since 1963, Lalonde Machinery Movers specializes in moving machinery, rigging, hoisting & millwrighting. If it is a single piece of equipment or an entire manufacturing facility, you can count on Lalonde Machinery Movers to offer competitive rates, and deliver services that far exceed customer expectations.

Moving 388,000 lbs !

In most cases, moving a piece of machinery of this size is not possible. Load restrictions generally forbid this over a long distance. However, exceptions can be made for short distance travel, as was the case for this project move.

Lalonde Machinery Movers were contracted to move a 3000 ton MIR Injection Moulding Machine. This equipment was going from one plant, to another, less than 1 kilometer away. As a result, we were able to use a 12 axle, 96 wheeled trailer.

Once inside the plant, we transferred to an 8 axle, 64 wheel trailer, and used this to move CLAMP portion of this injection moulding machine through plant to it's final position.

This move required 3 separate setups and tear downs of our 400ton Gantry system.
